

STUDENT HEALTH POLICY
Freedom Thinkers Education
PBL Society

A. Immunization

Notwithstanding the Infant Act, immunizations administered in schools shall have parent consent and not be administered unless such consent has been given.

B. Medical Alerts

1. A binder will be used in the school to maintain a current record of student medical alerts and student medical conditions. This binder will be accessible to all staff in the school.
2. The binder will consist of three sections:
 - completed school Medical Information form
 - recent picture of the student
 - Care Plan
3. At the entry into our school, the school will:
 - Have parents complete and sign a Medical Information form for each child. If their child has a medical condition diagnosed by a physician that may require precautionary treatment at school, all staff will be aware of it and the information will be placed in the binder mentioned above.
4. School personnel will review the Medical Information form and devise an emergency preparedness plan in cases where there are life-threatening conditions.
5. Any medical condition reported as an allergy to any substance that a child has a life-threatening condition to shall be treated as a medical alert.

6. Medical Alert Definition:

A Medical Alert Condition - a physician diagnosed, potentially life threatening condition such as:

- Diabetes
- Epilepsy
- Anaphylaxis
- Severe Asthma
- Blood clotting disorders requiring immediate care
- Other conditions which may require emergency care as determined in consultation with parents/student/family physician, school and Medical Health Officer or designate.

7. The Principal (or designate) will inform the school staff of the students who have medical alerts.
